

# HELOFLIGHT FLIGHT TRAINER

ETC's Aircrew Training Systems introduces the **NEXT GENERATION of Rotary Wing Flight Simulation and Training** to meet the demands of Military, Law Enforcement, Homeland Security, Customs & Border Patrol and UAV Training markets.

Our new **HeloFlight** with its dynamic motion platform provides a cost effective training platform with realistic motion for all flight regimes. The **HeloFlight** is a two

place, side-by-side cockpit with dual flight controls. A complete instrument panel is provided for VFR and IFR training. The instrumentation is displayed on an LCD with functioning knobs. All switches and controls replicate the size, shape, color and location of those in the real aircraft.

The cockpit is **RECONFIGURABLE** for a variety of helicopter types, with complete instrument panels.

## OPTIMIZED HELICOPTER PILOT TRAINING

## GUNNERY STATION UPGRADE EASILY MOUNTS ON THE BACK

#### SPECS:

- Hydraulic Motion Platform
- +-25 degree roll
- 24" heave range
- 45 degree pitch, variable range
- HD 16:9 projection
- Optional Helicopter Systems (Nav, Hyd, GPS, Failures, etc.)

#### BENEFITS

- VFR/IFR platform
- Instructor station
- Reconfigurable cockpits
- EFIS or standard instruments

#### UPGRADES

- Winch trainer upgrade can be mounted to the back of the core helo cockpit
- Gunnery Station can be mounted to the back of the core helo cockpit

#### WFOV VISUALS

- The instrumentation is displayed on an LCD with functioning knobs.
- Instructor Controlled Meteorological Conditions
- Photo textured landscapes including population centers, villages, towns, roads, rivers, and topographical features
- Controllable cultural lighting
- Detailed airport areas
