

NIGHT VISION TRAINING SYSTEM

The Night Vision and Night Vision Goggle Training Systems provide specialized training in both unaided and aided night vision to optimize aircrew readiness and performance in night operations.

AIRCREW TRAINING
SYSTEMS

NIGHT VISION TRAINING

ETC'S COMPREHENSIVE GROUND-BASED NIGHT VISION TRAINING SYSTEMS COMBINE ACADEMIC INSTRUCTION WITH INTERACTIVE DEMONSTRATIONS TO OPTIMIZE A PILOT'S EFFECTIVENESS AND REDUCE MISHAPS FOR NIGHT FLYING DURING NIGHT VISION OPERATIONS.

SYSTEM COMPONENTS

- Automated audiovisual presentations
- Light and color illusion demonstrators
- Virtual Terrain Model Board
- Physical Terrain Model Board
- Training Profile Editors

NIGHT VISION TRAINING

- Academic review of night vision
- Demonstration of night vision limitations
- Night vision illusions in flight
- Effects of moon and star light changes
- Distinguishing terrain features at night

NIGHT VISION TRAINING

- Academics on NVG features
- Focusing and adjustments
- Advantages and limitations
- Effects of environmental factors
- Familiarizing terrain imagery
